

INSTRUCTION MANUAL

Mini Portable Air Purifier

Model:Mino Pro

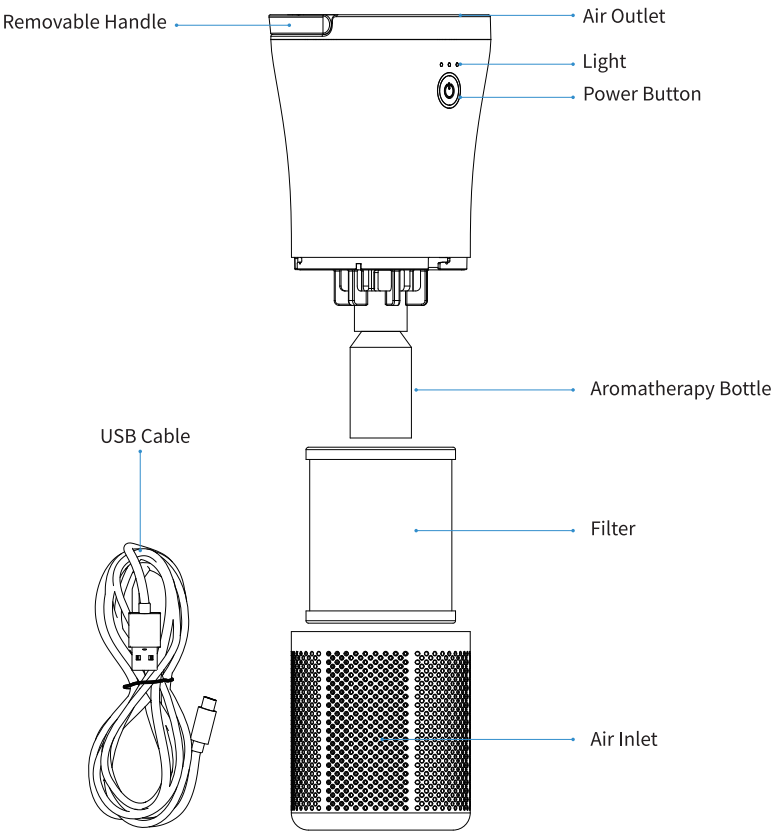

us@customer-afterservice.com

CAUTION

- Do not operate the machine while driving (may cause traffic accidents).
- Do not install or install in a location that obstructs the front view, hinders driving, or poses a danger to passengers (causes traffic accidents or injuries).
- Do not damage, forcibly bend, pull, twist, bundle, keep away from heat, place heavy objects on it, squeeze or modify it. Also, do not use a damaged USB cable (a damaged USB cable may cause a short circuit, fire or electric shock).
- Do not touch or get pinched by moving parts such as the gear lever, steering wheel, or seat, and do not wire them in a way that interferes with driving (possible risk of accident or injury).
- Do not connect or disconnect the car adapter or USB cable with wet hands (may cause electric shock).
- When disconnecting the car adapter or the USB cable, do not pull the USB cable.
- Do not put drinking water, soot, metal or flammable items into the main unit from the air outlet or suction port (causing fire or electric shock).
- If there is an abnormality (burning smell, etc.), please stop the operation and unplug the car adapter and USB cable (it may cause fire or electric shock).
- If the product will not be used for a long time, be sure to unplug the USB data cable from the accessory socket. Do not touch the metal parts of the car adapter.
- Do not let children use it alone or use it in places where infants and young children can't reach (it will cause electric shock injury).
- If you use indoor fume-type (smoke-type) insecticide or deodorizer, when you move it to another place, it may accumulate inside the machine and be discharged from the air outlet, which is bad for your health.
- On rough roads, steps, etc, reduce the driving speed or remove the main unit from the cup holder (the main unit may jump out of the cup holder, causing personal injury or main unit damage).

STRUCTURE

SPECIFICATION

Model	Mino Pro
Product Size	2.87*2.87*7.08inch(7.3*7.3*18cm)
Power Supply	5V==2.0A
Power	10W
Product	200g

CUSTOMER SUPPORT

- ④ Store it in a dry place without direct sunlight.

TROUBLESHOOTING

Problem	Recommendation
The product doesn't work	• The product does not have enough power or is not plugged into a power source
Wind speed is too low	• Filter still in film packaging → Remove the filter from the transparent film packaging and install it correctly. • The filter is very dirty. → Use a vacuum cleaner to remove dust.
A loud noise when operating	• A foreign object may be inside the product → Check inside and remove any foreign object. • The purifier can be adjusted in 3 levels: low, medium and strong. If you want it to be quieter, set the low level.
Strange smell	• After long-term transportation and closed packaging, there may be a slight smell at the beginning of use, but the smell will dissipate quickly after use. • The filter is dirty. → The filter is strong and absorbs odors. Please wash and replace when there is an odor. • The air cleaner emits a burning smell. → Immediately stop using this product and unplug, contact the online store where you purchased.
The red blinking doesn't stop even after replacing the filter	• The filter replacement notification function has not been reset. → Press and hold the power button for about 7 seconds to reset the filter replacement notification function.
